

Website Layout Mapping & Wireframe Blueprint

1. The Hero Section (Top of Page)

- **Visual Choice:** Dark, high-contrast, premium industrial slate or deep charcoal background with a subtle, abstract technical vector or clean facility blueprint overlay.
- **Layout:** Centered typography using a crisp, geometric sans-serif font (like Inter or Montserrat).
- **Placement:**

SWISS CONTROLS

Engineering the Future of Industry

[Sub-text: A Brand by RIGITRADE AG]

- **CTA Button:** "Discuss Your Project" (anchors smoothly down to the Contact form).

2. The Trust & Metrics Bar ("At a Glance")

- **Visual Choice:** A clean, contrasting horizontal ribbon (light silver or white background if the hero is dark) directly below the hero section.
- **Layout:** A 4-column counter layout.
- **Implementation:**

20+	5	100%	International
Years of Engineering Experience	Core Engineering Disciplines	Vendor-Independent Engineering	Projects Across CH, EU, GCC & Africa

3. Service Block Grid (The Core Engine)

- **Visual Choice:** A 2x3 or 3x2 card layout with a clean hover effect (e.g., subtle blue/gray accent borders when a user rolls over a card).
- **Tip:** Use minimalist line icons for each service category:
 - **Industrial Automation:** *Processor/Network icon*
 - **Electrical Engineering:** *Transformer/ ⚡ bolt icon*
 - **System Integration:** *Connected puzzle pieces/node icon*
 - **Engineering Consulting:** *Drafting blueprint/compass icon*
 - **Commissioning & Lifecycle:** *Shield/circular refresh arrow icon*
 - **Procurement & Sourcing:** *Global logistics/factory icon*

4. Our Engineering Process (The Timeline)

- **Visual Choice:** Horizontal chevron track or an active vertical timeline.
- **Flow:** Discover → Engineer → Integrate → Deliver → Support.

- **Design Hack:** Keep the background clean and minimalist here so the text blocks are highly readable.

5. Technology Platform Grid (The Authority Builder)

- **Visual Choice:** A horizontal ticker or a clean grid wall.
- **Implementation:** Instead of bulleted text, use **monochromatic, clean gray logos** for *ABB, Siemens, Schneider Electric, Rockwell Automation, Beckhoff, Phoenix Contact, WAGO, Mitsubishi, Omron, Cisco, and Pepperl+Fuchs*. This gives an instant enterprise-grade feel.

Quick Pre-Launch Technical Checklist

1. **Email Routing:** Ensure info@swiss-controls.com is configured with professional MX records (Google Workspace or Microsoft 365) and includes SPF/DKIM/DMARC protection so your factory qualification RFQs never hit spam filters.
2. **Domain Alignment:** Ensure both swiss-controls.com and your main corporate domain redirect smoothly to the same destination depending on your traffic strategy.
3. **Typography:** Use a strong typographic hierarchy. H1 and H2 tags should be bold and professional, while the body copy should have ample line-height (\$1.5\$ to \$1.6\$) for seamless scannability.
